

JUNAIDI SAMSUDIN

Full Stack Developer · Development Support Analyst · MSc Computer Science (In Progress) · Agile (CSM · CSPO)

+65 9145 7896 | junaidi@tulynq.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full Stack Developer and Development Support Analyst with hands-on experience building modern web applications using Python, Django, Django REST Framework, React, Node.js and MySQL — combined with enterprise software exposure at NAVTOR in the maritime domain.

Brings a distinctive blend of software development, product support, debugging, legacy enterprise systems (C#/ASP.NET/SQL Server) and 10+ years of technical and operational leadership across maritime, manufacturing and defence — bridging real-world domain expertise with modern engineering practice.

Delivers end-to-end applications from database schema through APIs to frontend UI and testing, with Agile/Scrum practice (CSM, CSPO) and growing interest in scalable backend systems and AI-assisted software solutions.

TECHNICAL SKILLS

Backend	Python · Django · Django REST Framework · Node.js · REST APIs · JWT (SimpleJWT)
Frontend	React.js · JavaScript (ES6+) · HTML5 · CSS3 · Bootstrap · Vite · React Router · Axios
Databases	MySQL · PostgreSQL · SQLite · SQL Server
AI / ML	Google Gemini API · Prompt Engineering · LLM Reranking · NLP Search · AI Recommendations
Legacy / Ent.	C# · ASP.NET Web Forms · SQL Stored Procedures · Enterprise Application Support
Testing	Pytest · DRF APITestCase · Postman · Locust · Lighthouse
Tools	Git · GitHub · GitHub Actions · VS Code · Docker (basic)
Practices	Agile / Scrum (CSM · CSPO) · SDLC · OOP · Clean Code · Code Reviews · Root Cause Analysis

PROFESSIONAL EXPERIENCE

Development Support Analyst / Junior Developer · NAVTOR Singapore Pte Ltd Feb 2026 – Present

- Transitioned fully into the development team, contributing to product engineering, defect resolution and software improvement across maritime software platforms (NavBox / NavSync domain).
- Investigate and triage support tickets — reproducing defects, identifying root causes and collaborating with developers to ship fixes.
- Contribute to codebase improvements and maintenance enhancements that reduce recurring support issues and improve product stability.
- Work hands-on with legacy enterprise systems using C#, ASP.NET Web Forms, SQL Server and stored procedures.
- Apply debugging, testing and root cause analysis to drive product quality improvements, bridging support domain knowledge into engineering decisions.
- Operate within Agile/Scrum delivery practices, participating in sprint cycles and cross-functional team collaboration.

Technical Executive · NAVTOR Singapore Pte Ltd Oct 2019 – Feb 2026

- Primary technical interface between global maritime clients and product teams, delivering software support and technical guidance across diverse markets.
- Reduced configuration setup time by ~30% through process streamlining and tooling improvements.
- Channelled client feedback into product and engineering teams to drive usability improvements and product quality enhancements.
- Led client training and onboard installations, improving product adoption and client satisfaction outcomes.

HSE Coordinator · [Keppel FELS Limited](#)

Nov 2012 – Oct 2019

- Managed safety compliance, contractor coordination and operational readiness across major offshore construction projects.
- Drove incident reduction through disciplined risk controls, process improvements and cross-team safety accountability.

Rifleman / Platoon Medic / Vehicle 2IC · [Singapore Armed Forces](#)

Mar 2005 – Jan 2010

- Served in operational and peace support missions, supporting mission readiness, team safety and logistics coordination.

SELECTED PROJECTS

TasteMatch — Local Food Discovery Platform

[React](#) · [Django REST Framework](#) · [Node.js](#) · [JWT](#) · [MySQL](#)

- Built a full-stack food tourism platform featuring quiz-based recommendation matching, vendor discovery, reservations and reviews.
- Designed weighted recommendation matching logic and implemented JWT authentication, vendor APIs and a fully responsive UI.
- Developed React frontend, Django REST backend and a Node.js matcher service, with full SDLC documentation (wireframes, ERD, activity flows).

GitHub: github.com/DdJunaidi/tastematch

SmartShop — AI-Powered E-Commerce Platform

[Django](#) · [React](#) · [Google Gemini API](#) · [JWT](#) · [MySQL](#)

- Built AI-powered product recommendations, a conversational chatbot, smart search and review summarisation using the Google Gemini API.
- Implemented JWT security, scalable product and review APIs, validated with Pytest, Locust and Lighthouse.

GitHub: github.com/DdJunaidi/smartshop

HopeHands — Volunteer Management System

[Django](#) · [React](#) · [MySQL](#) · [JWT](#)

- Developed a CRM-style volunteer platform with approvals workflow, admin dashboard, CSV imports and HubSpot CRM integration.
- Secured admin flows with JWT authentication and built scalable admin tooling for volunteer lifecycle management.

EDUCATION

Master of Science — Computer Science (Software Engineering) · [Guglielmo Marconi University via Lithan Academy](#)

In Progress · Expected Oct 2026

- Focus areas: Software Engineering, Architecture, Advanced Programming and Systems Design.
- Pursuing part-time alongside active software development role at NAVTOR.

Professional Diploma in Full Stack Web Development (SCTP) · [Lithan Academy](#)

Completed 2025

- Core stack: Python, Django, React, MySQL, REST APIs, Bootstrap, JavaScript.

Diploma in Engineering — Computer Network & Systems · [Singapore Polytechnic](#)

GPA 3.3

CERTIFICATIONS

- Certified ScrumMaster (CSM) — Scrum Alliance
- Certified Scrum Product Owner (CSPO) — Scrum Alliance
- PMI Talking to AI: Prompt Engineering for Project Managers
- PMI Generative AI Overview for Project Managers
- Advanced Certificate in Workplace Safety & Health
